DETAILED ACTION

Upon reconsideration of the prior art the allowability of claims 19-~~26~~²⁴ is withdrawn.

Rejections with the prior art follow. Examiner regrets any inconvenience to Applicant.

Terminal Disclaimer

The terminal disclaimer filed on 9 August 2005 disclaiming the terminal portion of any patent granted on this application which would extend beyond the expiration date of application no. 10/616,298 has been reviewed and is accepted. The terminal disclaimer has been recorded.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 19-24 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claim 19, line 26, "the plurality of posts" should be --plurality of vertical posts--.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are

Art Unit: 3643

such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 19-21, 23, and 24 are rejected under 35 U.S.C. 103(a) as being unpatentable over Wi (US 5,438,795) in view of Siccardi (US 4,737,103) in further view of Bohanon Sr. (US 4,445,426).

As to claim 19, Wi discloses a greenhouse with the exterior wall structure with transparent panels (shown in Fig. 1 for the far sidewall) and defined by a plurality of benches (G of Fig. 1), vertical posts (shown in Fig. 1 for the far sidewall), each bench associated with a span between posts (in that in Fig. 1 there are ten “benches” (i.e., growing regions) and 10 spans, excluding the two de minimis, triangular spans at the bottom corners). Not disclosed is an air handling system which includes a plurality of air moving fans each mounted in a respective one of a plurality of fan housings having one interior air intake, one interior air outlet, one exterior vent, and one component for air changing, wherein the plurality of fan housings is equal to the number of spans between the plurality of vertical posts. Siccardi, however, discloses a air handling system for a greenhouse (col. 1, line 20) which includes a plurality of air moving fans (115 of Fig. 5; plurality when more than one unit is used) each mounted in a respective one of a plurality of fan housings (111 of Fig. 5; plurality when more than one unit is used) of having one interior air intake (213 and 215 of Fig. 5), one interior air outlet (region around 115 of Fig. 5), one exterior vent (region around 211 of Fig. 5), and one component for air changing (119 of Fig. 5); Bohanon Sr. discloses the concept of mounting the fan housing between vertical posts (see 10 of Fig. 1). It would have been obvious to one of ordinary skill in the art at the time of the invention to modify the greenhouse of Wi by using the air conditioning system of Siccardi to heat the greenhouse with moderate air velocity (see Siccardi at col. 1, lines 23-39) and to place

Art Unit: 3643

the fan housings between vertical posts as an efficient building method and to use a plurality of housings to increase the air conditioning power.

As to claim 20, Wi as modified by Siccardi and Bohanon Sr. further disclose the fan housings being inside the posts (in that inside the greenhouse of Fig. 5 of Siccardi)..

As to claim 21, Wi as modified by Siccardi and Bohanon Sr. further disclose a wall panel the height of the fan housing (see Fig. 1 of Bohanon Sr.).

As to claim 23, Wi as modified by Siccardi and Bohanon Sr. further disclose an air outlet (either region around 211 or 115 of Fig. 5 of Siccardi).

As to claim 24, Wi as modified by Siccardi and Bohanon Sr. further disclose a suction air inlet (211 or of Fig. 5 of Siccardi).

Allowable Subject Matter

Claims 2, 4-16, 25, and 26 are allowed over the art of record.

Claim 22 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.

Response to Arguments

Applicant's arguments with respect to any of the rejected claims have been considered but are moot in view of the new ground(s) of rejection.
